-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10-28-03.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kashimoto (US 5844645) in view of Yamauchi et al (US 5745202).

Kashimoto discloses and shows (Figure 4) an active matrix liquid crystal display (LCD) panel comprising:

first and second substrates (11,21);

an active region including pixel electrodes 13 and TFT(s) (not shown) components such as source lines 12 disposed on the first substrate 11;

a pad region (inherent, not shown) along a periphery of the active region and along a corresponding region of the second substrate;

a sealing region including sealing element 40 (inherently) between the active region and the pad region, wherein the sealing element attaching the first substrate to the second substrate and (inherently) maintaining a gap there between;

a light-shielding layer 26 in the active regions except the sealing region on the second substrate 21;

a liquid crystal layer 50 within the gap and on the active region side of the sealant.

Art Unit: 2871

UV-type hardening material used for the sealing element is common and known in the liquid crystal display art.

The limitation not disclosed by Kashimoto is a light shielding layer in the pad region.

Yamauchi teaches the use of a light member formed to protect external driving circuit (IC) from extraneous light or internal traveling light (thus preventing malfunction to the display device). Therefore, it would have been at least obvious to one of ordinary skill in the art to employ a light-shielding member in the pad region for protecting external driving circuit (IC) from extraneous light or internal traveling light (thus preventing malfunction to the display device).

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
